[Wandering in the footsteps of Ohm and Liebig – Studying Sciences at FAU Erlangen-Nürnberg](#)

You want to spend a semester abroad or even pursue a M.Sc.-Degree fully taught in English? Erlangen is then the perfect place. Excellent teaching and top-notch research facilities make FAU one of Germany's top ten universities and one of the world's top 100 in Sciences. Studying with us will definitely boost your career perspectives.

Sounds interesting? Join our Webinar! We will provide you with first-hand information about life and academics in Erlangen.

Talking about academics: Interdisciplinarity is one of our core strengths here at FAU. We will show you how to benefit from an inspiring scientific environment. You will receive an overview on our established study programs which are taught completely in English such as Chemistry, Physics, Molecular Sciences or Integrated Life Science. Furthermore, we just introduced new programmes in English such as Climate and Environmental Studies, Computational and Applied Mathematics and Paleobiology – Earth Systems Research Lab and Integrated Immunology.

In addition, we will also address questions on application procedures, housing and finance and, of course, give some examples for the outstanding life quality here in Bavaria.

At the end of the Webinar, we will be happy to answer and discuss all questions which prey on your mind.
