

## Plant Health Master Information letter N° 2

The European Master Degree in Plant Health in Sustainable Cropping Systems (PlantHealth) is a 2-year programme that offers to its participants the unique opportunity to study plant health in an international setting at two of Europe's leading institutions in this field, obtaining a double diploma. It combines highly specialised training, international prestigious Lecturers, Field Trips and other practical learning. It aims to training young, bright minded and internationally active students, so that they can contribute to the development of their home countries through their agricultural expertise and passion.

PlantHealth has been labelled Erasmus Mundus Joint Master Degree by the EACEA and is therefore recognised as the European education programme of excellence in the field of plant health.

This letter intends to give you a summary of the main Plant Health Master activities since its beginning and gives you an opportunity to develop collaborations with Plant Health students, teachers and Universities dedicated to deliver this Master.

### Plant Health University partners

PlantHealth Master is delivered by a consortium of 6 European Universities in France, Germany, Italy and Spain. The consortium is coordinated by the Polytechnic University of Valencia in Spain.

## INTAKE 1: Graduation Ceremony

*PlantHealth Intake 1: 21 students from 13 different nationalities*

In September 2018 PlantHealth will celebrate the graduation of the first promotion of students.

The Master will organize a Final Conference where the students will have the chance to present the results of their master theses to a public of plant health experts and representatives of companies and institutions of the plant health sector.

See some of the master thesis topics here: [http://planthealth.upv.es/master\\_thesis](http://planthealth.upv.es/master_thesis)

**Associated partners** are warmly welcome to participate in the Final Conference and let the graduates better know about their institution and future job.

To participate please contact [Planthealth@upv.es](mailto:Planthealth@upv.es)

---

## INTAKE 2: Practical Training and Field Trips

*PlantHealth Intake 2: 20 students from 16 different nationalities*

The PlantHealth Master is a practice-oriented programme, offering a wide range of activities such as internships, laboratory research, field trips, etc. Besides, each year we welcome guest lecturers to give seminars on specific topics.

Please feel free to let us know about your company/institution job and internship possibilities. Contact: [Planthealth@upv.es](mailto:Planthealth@upv.es)

---

## Plant Health 3<sup>rd</sup> call of candidates

The third call for self-funded students is now open up to end of June 2018.

Please feel free to circulate this call in your networks and let us know about the scholarship programs that could further support students.

You will find the calls here: [www.planthealth.upv.es](http://www.planthealth.upv.es)

## Plant Health 3<sup>rd</sup> call for guest lecturers

The European Master Degree in Plant Health in Sustainable Cropping Systems (PlantHealth) welcomes applications from leading academics and practitioners from **any country in the world** to contribute as **visiting scholars/guest lecturers** to teaching on the programme. Take this opportunity to let our students know about your research and companies.

Find the call on [http://planthealth.upv.es/guest\\_lecturers](http://planthealth.upv.es/guest_lecturers)

## Employability

### Master thesis

The majority of the students do their **Master's theses** in collaboration with associate members and/or other relevant actors within industry and academia (6 months March to August).

### Employability platform

Industrial partners can **disseminate job offers** inside the PlantHealth employability platform by contacting the PlantHealth Secretariat. [Planthealth@upv.es](mailto:Planthealth@upv.es)

## Agenda

**Associated partners play a key role in integration, networking and employability of students and alumni.** They are a key success factor in training, promoting, sponsoring and advisory activities to make PlantHealth a professional training programme adapted to today's and tomorrow's market needs.

Join the plant Health **first advisory board, first plant health graduation ceremony for intake 1 students, and welcoming events for intake 3**

on September 18 <sup>th</sup> and 19 <sup>th</sup> 2018 in Valencia.
--

This Master is implemented and labelled under the Erasmus+/Erasmus Mundus Programme.

Co-funded by the  
Erasmus+ Programme  
of the European Union
